

NIKOLA RANDJELOVIC

Product Manager | Systems & Platform Delivery

DETAILS

Niš, Serbia

hello.ranikola@gmail.com | +381 62 369 258

linkedin.com/in/ranikola | cv.ranikola.dev

PROFILE

Product Manager with strong technical foundation focused on systems and platform delivery in B2B environments. Experienced in defining MVP scope, structuring roadmaps, and leading cross-functional teams across web and mobile products. Owns complex, API-driven and multi-team systems from discovery through launch readiness, aligning stakeholders in distributed and revenue-critical environments. Combines product ownership with deep system understanding to deliver scalable and stable platforms.

EMPLOYMENT

Product Manager, RUTE INC – Remote

April 2024 – Present

Impact

External B2B Transportation Management System (TMS) for carrier companies (web and mobile). Joined an existing product with multiple independent modules and no end-to-end MVP flow; defined the MVP scope, connected core modules into functional user flows, and led the product through beta toward launch.

- Owned MVP definition and Version 1 scope, transforming previously disconnected features into cohesive end-to-end product flows.
- Defined and maintained the product roadmap, aligning product priorities with business goals in collaboration with leadership and the product owner.
- Led product execution across a multi-team organization of ~40 people (~30 developers) spanning frontend, backend, mobile, QA, and design.
- Worked directly with external stakeholders and beta customers, translating feedback into product and UX decisions.
- Coordinated roadmap execution with engineering team leads across parallel work streams.

Result

Defined and delivered the first MVP of the TMS platform; completed the initial beta phase with five carrier companies and prepared the second beta cycle ahead of the planned product launch.

Additional Product Oversight

- Provided product leadership and organizational structure for three external e-commerce products, supporting two cross-functional teams of six developers
- Defined product processes, delivery standards, and cross-team coordination across the headless WordPress backend and Next.js frontend, working through designated team leads and Product Owners

Technical Project Manager, Better Collective — Niš, Serbia

July 2023 – Oct 2024

Impact

Delivery leadership for revenue-critical internal web platforms contributing ~60% of total company revenue, operating across distributed teams and international stakeholders.

- Led prioritization and execution across two distributed teams (UK, Serbia, Poland), supporting ~250 affiliate websites and campaign infrastructure
- Coordinated engineering delivery with stakeholders across Denmark, the UK, France, and the US, aligning campaign deadlines with technical execution
- Managed a WordPress-based backend powering high-traffic affiliate systems in a performance-critical environment
- Oversaw the rebuild of a React-based banner automation platform, improving campaign efficiency and analytics visibility

Result

Delivered stable execution across revenue-critical systems while rebuilding key campaign infrastructure.

Scrum Master, Better Collective — Niš, Serbia

June 2021 – July 2023

Impact

Supported the company's transition to Agile (Spotify model), enabling structured Scrum delivery across two affiliate infrastructure teams whose systems were used globally across ~3,500 WordPress websites.

- Facilitated Scrum adoption and clarified team roles during early-stage Agile transformation
- Acted as a bridge between Product Owners and engineering teams, aligning roadmap expectations with delivery capacity
- Supported backlog prioritization for API and web interfaces used by a 50-person content team
- Coordinated cross-team dependencies for systems consumed company-wide

Result

Stabilized Scrum practices across two teams during organizational Agile transition.

EARLIER TECHNICAL EXPERIENCE

Better Collective & Other Companies (2014 – 2021)

- Progressed from Web Developer to Senior Web Programmer at Better Collective
- Built large-scale WordPress affiliate platforms and backend services
- Developed APIs and internal tools using PHP and modern JavaScript
- Contributed to frontend systems using React and modern JS workflows
