PROFESSIONAL SUMMARY

Technical Product Leader with 10+ years across software engineering, product leadership, and organizational leadership in complex B2B SaaS environments.

Experienced in turning fragmented systems into production-ready platforms by aligning business goals with technical execution. Strong background in MVP definition, roadmap ownership, technical feasibility evaluation, launch execution, and leading cross-functional teams for API-driven B2B platforms.

For professional references, detailed metrics, and product approach: cv.ranikola.dev

PROFESSIONAL EXPERIENCE

Technical Product Lead, RUTE INC | Remote

April 2024 – Present | (US-based B2B logistics SaaS startup)

Brought in to lead the transformation of a fragmented Transportation Management System (TMS) where technical modules existed without cohesive product structure, defined MVP, or a realistic launch path.

Built product structure and execution discipline, defined product direction, and drove the platform from fragmented efforts to production launch serving carrier operations across web and mobile.

Key Outcomes & Leadership Impact

- **Product Strategy & Launch:** Transformed fragmented technical modules into a production-live B2B platform validated by 10 beta carrier companies. Defined product scope, MVP requirements, roadmap direction, launch readiness criteria, and Version 1 priorities.
- **Organizational Leadership:** Led a 40-person cross-functional execution organization across frontend, backend, mobile, QA, and design. Held formal authority over hiring, firing, performance reviews, disciplinary actions, compensation decisions, and execution quality.
- **Executive Partnership & Commercial Strategy:** Partnered directly with the CEO on product direction, execution priorities, estimation, organizational decisions, and long-term planning. Contributed to pricing, billing, and monetization decisions through direct engagement with beta customers, operational users, and business stakeholders.
- **Technical Product Leadership:** Collaborated with engineering leadership on architecture implications, API dependencies, technical feasibility, and implementation trade-offs. Applied engineering background to challenge assumptions, reduce ambiguity, and align product ambition with technical reality.
- **Process & Delivery Leadership:** Built prioritization frameworks, requirement standards, release processes, and execution discipline. Reduced fragmented communication and shifting business pressure, improving delivery stability and engineering focus.

Technical Project Manager, Better Collective | Niš, Serbia

July 2023 – October 2024 (Concurrent transition period) | (Publicly traded global affiliate media company)

Led technical product delivery and roadmap execution across revenue-critical engineering teams supporting affiliate marketing infrastructure and internal monetization platforms.

Key Responsibilities & Impact

- **Commercial Impact:** Led delivery for revenue-generating infrastructure contributing approximately 60% of total company revenue across 250+ websites.

- Roadmap & Prioritization: Shared product decision-making and prioritization ownership with business stakeholders in deadline-sensitive commercial environments, balancing commercial impact, feasibility, and engineering capacity.
- Execution & Alignment: Translated complex business requirements into structured technical execution plans, reducing ambiguity and accelerating decision-making.
- Technical Delivery: Partnered with engineering leadership and QA on feasibility assessment, release readiness, scope definition, and implementation strategy.
- Stakeholder Leadership: Acted as the primary coordination layer between business stakeholders and engineering teams, improving execution focus and delivery consistency.

Scrum Master, Better Collective | Niš, Serbia

June 2021 – July 2023 | (Publicly traded global affiliate media company)

Started in a traditional Scrum Master role during organizational Agile transformation, later expanding into broader product and delivery leadership responsibilities.

Partnered with Product Owners, engineering teams, and business stakeholders to improve execution discipline, prioritization clarity, backlog quality, and delivery effectiveness.

Key Responsibilities

- Facilitated Agile delivery processes, ceremonies, blocker removal, and team effectiveness improvements.
- Adapted Agile practices based on real team needs rather than rigid framework enforcement.
- Acted as a bridge between Product Owners and engineering teams, improving alignment and reducing friction.
- Provided technical and prioritization input based on engineering understanding and delivery realities.
- Supported backlog planning, stakeholder alignment, execution readiness, and product continuity.
- Temporarily absorbed product ownership responsibilities during organizational transitions, ensuring delivery continuity.

Senior Web Programmer / Software Engineer

2014 – 2021 | Better Collective & Earlier Roles

Built the engineering foundation that now informs product leadership and technical decision-making.

Key Technical Contributions

- Built backend systems and API integrations supporting affiliate infrastructure and revenue-generating digital platforms.
- Developed internal campaign management tooling supporting commercial operations, campaign execution, and monetization workflows.
- Built and supported WordPress platform architecture, frontend implementation, troubleshooting, and technical systems analysis.
- Progressed into senior technical responsibilities across backend systems, frontend engineering, APIs, and platform infrastructure before transitioning into product leadership.

Core Technologies

PHP, Laravel, JavaScript, HTML/CSS, WordPress, API integrations

CORE COMPETENCIES

Product Leadership

Product Strategy, MVP Definition, Product Scoping, Roadmap Ownership, Prioritization, Product Discovery.

Organizational & People Leadership

Team Building, People Management, Hiring & Performance Management, Cross-Functional Leadership, Execution Discipline.

Technical Product Management

API-Driven Systems, Technical Feasibility Evaluation, Architecture Collaboration, Systems Thinking, Engineering Alignment.

Business & Commercial

Pricing & Monetization, Beta Validation, Stakeholder Management, Commercial Decision Support.

TOOLS

Product & Collaboration: Jira, Confluence, Figma, Miro, Slack

Technical: Postman, Swagger, Git, BookStack

EDUCATION & CERTIFICATIONS

Professional Scrum Master I (PSM I)

Scrum.org | 2021

Faculty of Electronic Engineering, University of Niš

Software Engineering | Graduated 2016
