

NIKOLA RANDJELOVIC

TECHNICAL PRODUCT LEADER FOR B2B SaaS PLATFORMS

DETAILS

Niš, Serbia

+381 62 369 258 | hello.ranikola@gmail.com

linkedin.com/in/ranikola | cv.ranikola.dev

PROFESSIONAL SUMMARY

Technical Product Leader with **10+ years** across software engineering, product leadership, product delivery, and organizational leadership in complex **B2B SaaS** environments.

Experienced in turning fragmented systems into **production-ready platforms** by aligning business goals with technical execution. Strong background in **product strategy, product discovery, MVP definition, roadmap ownership, stakeholder management, technical feasibility evaluation, and launch execution**. Experienced in scaling **API-driven web and mobile B2B platforms** from concept to production launch.

PROFESSIONAL EXPERIENCE

Technical Product Lead, RUTE INC | Remote

April 2024 – Present | (US-based B2B logistics SaaS startup)

Brought in to lead the transformation of a fragmented **Transportation Management System (TMS)** where technical modules existed without cohesive product structure, defined MVP, or a realistic launch path.

Built product structure and execution discipline, defined product direction, and drove the platform from fragmented efforts to **production launch** serving carrier operations across **web and mobile**.

Key Outcomes & Leadership Impact

- **Product Strategy & Launch:** Transformed fragmented technical modules into a **production-live B2B platform** validated by **10 beta carrier companies**. Defined **product scope, MVP requirements, roadmap direction, launch readiness criteria, and Version 1 priorities**.
- **Organizational Leadership:** Led a **40-person cross-functional execution organization** across frontend, backend, mobile, QA, and design. Held **full people management responsibility**, including hiring, performance management, disciplinary actions, compensation decisions, and execution quality.
- **Executive Partnership & Commercial Strategy:** Partnered directly with the **CEO** on product direction, execution priorities, estimation, organizational decisions, and long-term planning. Contributed to **pricing, billing, and monetization decisions** through direct engagement with beta customers, operational users, and business stakeholders.
- **Technical Product Leadership:** Collaborated with engineering leadership on **architecture implications, API dependencies, technical feasibility, and implementation trade-offs**. Applied engineering background to challenge assumptions, reduce ambiguity, and align product ambition with technical reality.
- **Process & Delivery Leadership:** Built **prioritization frameworks, requirement standards, release processes, and execution discipline**. Reduced fragmented communication and shifting business pressure, improving **delivery stability and engineering focus**.

Technical Project Manager, Better Collective | Niš, Serbia

July 2023 – October 2024 | (Publicly traded global affiliate media company)

Led technical product delivery and roadmap execution across revenue-critical engineering teams supporting affiliate marketing infrastructure and internal monetization platforms.

Key Responsibilities & Impact

- **Commercial Impact:** Led technical product delivery across **2 agile teams (11 cross-functional team members)** responsible for revenue-generating infrastructure contributing approximately **40% of total company revenue** across **250+ websites**.
- **Roadmap & Prioritization:** Shared product decision-making and prioritization ownership with business stakeholders in deadline-sensitive commercial environments, balancing commercial impact, feasibility, and engineering capacity.
- **Product Delivery:** Managed delivery of a custom affiliate management platform used to create, configure, and track affiliate links, banners, and monetization assets across large-scale digital publishing operations.
- **Platform Leadership:** Led development of a React-based internal ad-tech platform enabling business teams to configure banner campaigns, display logic, market targeting, frequency rules, modal behavior, and click analytics.
- **Stakeholder Leadership:** Partnered with **5+ stakeholder leads across 3 commercial teams**, translating business objectives into structured engineering execution plans and delivery priorities.
- **Technical Delivery:** Coordinated cross-functional delivery across WordPress, React, QA, design, and engineering teams, including sprint planning, scope definition, feasibility assessments, release readiness, and roadmap execution.
- **Execution & Alignment:** Translated complex business requirements into structured technical execution plans, reducing ambiguity and accelerating decision-making.

Scrum Master, Better Collective | Niš, Serbia

June 2021 – July 2023 | (Publicly traded global affiliate media company)

Started in a traditional Scrum Master role during a large-scale organizational Agile transformation, evolving into broader product and delivery leadership responsibilities across revenue-critical affiliate monetization and ad-tech platforms.

Partnered with Product Owners, engineering teams, and business stakeholders to improve execution discipline, prioritization clarity, backlog quality, release readiness, and delivery effectiveness across multiple cross-functional teams.

Key Responsibilities

- Led Agile delivery across **2 Scrum teams (9 developers + 2 Product Owners)** supporting revenue-critical affiliate monetization and ad-tech platforms.
- Supported development of a content operations platform used by a **50+ member internal commercial organization** to manage partner offers, campaign data, and affiliate monetization workflows.
- Enabled delivery of API-driven infrastructure serving monetization data to approximately **3,000 WordPress websites**, supporting enterprise-scale affiliate content distribution.
- Led Agile execution for an ad-tech modernization initiative supporting a **15-member AdTech organization**, replacing a legacy JavaScript banner workflow with a scalable internal management platform.
- Contributed to delivery of systems supporting business functions responsible for approximately **25–30% of company revenue**.
- Facilitated sprint execution, backlog refinement, stakeholder alignment, blocker removal, release readiness, and delivery continuity during organizational Agile transformation.

Senior Web Programmer / Software Engineer

2014 – 2021 | *Better Collective & Earlier Roles*

Built the engineering foundation that now informs product leadership and technical decision-making, progressing from implementation-focused development into senior technical ownership across backend systems, frontend engineering, APIs, and platform infrastructure.

Key Technical Contributions

- Developed and maintained affiliate monetization infrastructure supporting approximately **3,000+ WordPress publishing properties** across large-scale digital media operations.
- Built and maintained **20+ PHP-based internal WordPress plugins** powering affiliate link management, banner delivery, cloaking workflows, automated monetization features, and partner integrations.
- Developed API-driven systems integrating external partner data, affiliate offers, betting odds, and campaign content into configurable publishing workflows for internal content teams.
- Engineered scalable frontend and backend solutions across PHP, Laravel, JavaScript, WordPress, HTML/CSS, and API integrations, including platform optimization, troubleshooting, and technical systems analysis.
- Built the technical foundation that later enabled transition into product, delivery, and strategic technical leadership.

CORE COMPETENCIES

Product Leadership

Product Strategy, Product Discovery, MVP Definition, Product Scoping, Roadmap Ownership, Prioritization, Go-to-Market Readiness.

Organizational & People Leadership

Cross-Functional Leadership, Organizational Leadership, Team Building, People Management, Hiring, Performance Management, Execution Discipline.

Technical & Systems Leadership

Technical Product Management, API-Driven Systems, Technical Feasibility Evaluation, Architecture Collaboration, Systems Thinking, Engineering Alignment.

Business & Commercial

Stakeholder Management, Pricing & Monetization, Beta Validation, Commercial Decision Support, Revenue-Critical Platform Delivery.

AI-Augmented Product Delivery

AI-assisted research, technical documentation, prototyping, workflow automation, engineering collaboration

TOOLS

Product & Delivery: Jira, Confluence, Figma, Miro, Mural, Slack, Monday.com

AI Tooling: ChatGPT, Claude, Gemini, Perplexity, Cursor, Codex, self-hosted Qwen (AnythingLLM)

Technical: Postman, Swagger, Git, BookStack

EDUCATION & CERTIFICATIONS

Faculty of Electronic Engineering, University of Niš

B. Sc. Software Engineering | 2016

Professional Scrum Master I (PSM I)

Scrum.org | 2021
